Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Shirley E. Brown and Traci C. Curry provide word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

Digest

U.S. Share of World Trade Falls (see p. 2). U.S. agricultural exports fell 9 percent, a \$2.8-billion decline, during the first 9 months of fiscal year 1991. Lower exports to the Soviet Union contributed to about half of this decline, while lower exports to Asia and the Middle East accounted for much of the remaining loss.

October-June Agricultural Imports Up Slightly (see p. 5). U.S. agricultural imports totaled \$17.3 billion for October-June, up just \$22 million from last year at this time. Imports of noncompetitive commodities declined by 5 percent (\$108 million).

U.S. Share of World Trade Falls

U.S. agricultural exports fell 9 percent, a \$2.8-billion decline, during the first 9 months of fiscal year 1991. Lower exports to the Soviet Union contributed to about half of this decline, while lower exports to Asia and the Middle East accounted for much of the remaining loss.

Increased global supplies of wheat lowered the relative cost of wheat for feed compared with the cost of feed grains. During the previous 2 years, U.S. corn and sorghum exports had benefited from relatively tight world wheat supplies. The United States is the dominant supplier of coarse grains on world markets, but other exporters, such as the European Community (EC), dominate world trade in wheat for feed.

Abundant wheat supplies particularly affected exports to Asia. Sales to Asia were also affected by increased Chinese coarse grain exports. Larger sales by China in 1990/91 helped reduce U.S. exports to Japan and Korea. Market liberalization in Japan and Korea helped increase U.S. meat exports to these countries, and other high-value product (HVP) exports rose as well. However, U.S. exports to Japan declined \$181 million, and overall exports fell \$335 million as lower grain and oilseed exports undercut HVP increases.

Weakening Soviet purchasing power cut into U.S. exports to the USSR. A near-record Soviet grain crop reduced import needs, but a rising Soviet trade deficit and a declining credit rating crimped the Soviet Union's ability to purchase food. U.S. credit guarantees helped support exports of poultry meat and soybean meal during the first 9 months of FY 1991. The level of poultry meat exports was unchanged from the first 9 months of FY 1990. U.S. soybean meal exports fell 13 percent to 1.2 million tons, compared with a 60-percent decline in corn exports and a 42- percent

drop in wheat exports. Since South American soybean meal exporters are unable to offer credit (Brazil and Argentina are themselves borrowers rather than lenders), the United States has been able to increase its share of Soviet soybean meal purchases during FY 1991.

The cessation of exports to Iraq under a U.N. embargo created a \$550-million decline in exports to the Middle East. Reduced soybean oil exports to Pakistan cut exports to South Asia by \$290 million.

U.S. exports to China fell by \$108 million as U.S. wheat and corn sales there contracted. Lower wheat and soybean meal sales cut U.S. exports to North Africa by \$198 million. Egypt, the largest U.S. market in North Africa, accounted for half of the decline, but exports were lower to every country in the region.

Exports to the EC fell by \$279 million during the first 9 months of FY 1991. Soybean meal use fell during the period, continuing a long-term trend of substituting other protein meals, particularly rapeseed meal. The United States also saw its share of the EC oilseed market sliced by Brazil and Argentina.

Exports to Canada rose by \$618 million, but about half of the increase stemmed from changes in how the U.S. Government reports trade data. Before January 1990, U.S. exports to Canada were understated in U.S. trade data, and remedying that problem created the appearance of an increase in exports. But there was an actual increase in exports of about \$300 million. Canada's interest rates were high compared with U.S. interest rates, supporting the value of the Canadian dollar versus the U.S. dollar, and ultimately boosting Canada's imports of both food and nonfood items. (Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0822)

October-June Agricultural Imports Up Slightly

U.S. agricultural imports totaled \$17.3 billion for October-June, up \$22 million from last year at this time. Imports of noncompetitive commodities declined by 5 percent (\$108 million).

Coffee imports, which made up over 35 percent of the value of all noncompetitive imports, dropped 8 percent. Volume dropped by 16 percent. Shipments declined from Mexico, Central America, Colombia, the Caribbean, and Africa. Import shipments from Ethiopia dropped 90 percent during this time but increased from Brazil, which provided over 25 percent of all coffee. Banana and plantain import value increased 4 percent. Cocoa's import value decreased less than 1 percent as the unit value rose slightly from the year before.

Live animal and animal product imports remained the same as in FY 1990. Increased value of beef and veal products, pork, and animal fats offset decreases in such dairy products as eggs, hides and skins, and particularly casein, milk, and cream. The value of

hides and skins dropped 19 percent from \$149 million to \$120 million.

The quantity and value of fruit imported also remained the same as last year. Short supplies of domestic apples triggered increased imports from Canada, and the California freeze stimulated imports of mangoes and melons from Mexico and fresh citrus from Mexico and Spain. Grape imports, which come almost exclusively from Chile, declined by 6 percent. Orange juice imports continued to decline as the Florida orange industry recovers from last year's freeze. Nut imports increased 35 percent largely due to increases in cashew nuts from India.

Vegetable import value dropped 7 percent, but values for tomatoes dropped 35 percent and peppers 17 percent. The Florida vegetable crops improved in 1991 after the 1990 freeze, boosting supply and reducing price.

Wine import value climbed slightly in FY 1991 mostly due to unit value increases. Volume dropped from 2.1 million hectoliters to 1.8 million. (Susan Pollack, Commodity and Trade Analysis Branch, 202-219-0822)

INDEX OF APPENDIX TABLES

Exports

Table		Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2

Digest

U.S. Share of World Trade Falls (see p. 2). U.S. agricultural exports fell 9 percent, a \$2.8-billion decline, during the first 9 months of fiscal year 1991. Lower exports to the Soviet Union contributed to about half of this decline, while lower exports to Asia and the Middle East accounted for much of the remaining loss.

October-June Agricultural Imports Up Slightly (see p. 5). U.S. agricultural imports totaled \$17.3 billion for October-June, up just \$22 million from last year at this time. Imports of noncompetitive commodities declined by 5 percent (\$108 million).

U.S. Share of World Trade Falls

U.S. agricultural exports fell 9 percent, a \$2.8-billion decline, during the first 9 months of fiscal year 1991. Lower exports to the Soviet Union contributed to about half of this decline, while lower exports to Asia and the Middle East accounted for much of the remaining loss.

Increased global supplies of wheat lowered the relative cost of wheat for feed compared with the cost of feed grains. During the previous 2 years, U.S. corn and sorghum exports had benefited from relatively tight world wheat supplies. The United States is the dominant supplier of coarse grains on world markets, but other exporters, such as the European Community (EC), dominate world trade in wheat for feed.

Abundant wheat supplies particularly affected exports to Asia. Sales to Asia were also affected by increased Chinese coarse grain exports. Larger sales by China in 1990/91 helped reduce U.S. exports to Japan and Korea. Market liberalization in Japan and Korea helped increase U.S. meat exports to these countries, and other high-value product (HVP) exports rose as well. However, U.S. exports to Japan declined \$181 million, and overall exports fell \$335 million as lower grain and oilseed exports undercut HVP increases.

Weakening Soviet purchasing power cut into U.S. exports to the USSR. A near-record Soviet grain crop reduced import needs, but a rising Soviet trade deficit and a declining credit rating crimped the Soviet Union's ability to purchase food. U.S. credit guarantees helped support exports of poultry meat and soybean meal during the first 9 months of FY 1991. The level of poultry meat exports was unchanged from the first 9 months of FY 1990. U.S. soybean meal exports fell 13 percent to 1.2 million tons, compared with a 60-percent decline in corn exports and a 42-percent

drop in wheat exports. Since South American soybean meal exporters are unable to offer credit (Brazil and Argentina are themselves borrowers rather than lenders), the United States has been able to increase its share of Soviet soybean meal purchases during FY 1991.

The cessation of exports to Iraq under a U.N. embargo created a \$550-million decline in exports to the Middle East. Reduced soybean oil exports to Pakistan cut exports to South Asia by \$290 million.

U.S. exports to China fell by \$108 million as U.S. wheat and corn sales there contracted. Lower wheat and soybean meal sales cut U.S. exports to North Africa by \$198 million. Egypt, the largest U.S. market in North Africa, accounted for half of the decline, but exports were lower to every country in the region.

Exports to the EC fell by \$279 million during the first 9 months of FY 1991. Soybean meal use fell during the period, continuing a long-term trend of substituting other protein meals, particularly rapeseed meal. The United States also saw its share of the EC oilseed market sliced by Brazil and Argentina.

Exports to Canada rose by \$618 million, but about half of the increase stemmed from changes in how the U.S. Government reports trade data. Before January 1990, U.S. exports to Canada were understated in U.S. trade data, and remedying that problem created the appearance of an increase in exports. But there was an actual increase in exports of about \$300 million. Canada's interest rates were high compared with U.S. interest rates, supporting the value of the Canadian dollar versus the U.S. dollar, and ultimately boosting Canada's imports of both food and nonfood items. (Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0822)

October-June Agricultural Imports Up Slightly

U.S. agricultural imports totaled \$17.3 billion for October-June, up \$22 million from last year at this time. Imports of noncompetitive commodities declined by 5 percent (\$108 million).

Coffee imports, which made up over 35 percent of the value of all noncompetitive imports, dropped 8 percent. Volume dropped by 16 percent. Shipments declined from Mexico, Central America, Colombia, the Caribbean, and Africa. Import shipments from Ethiopia dropped 90 percent during this time but increased from Brazil, which provided over 25 percent of all coffee. Banana and plantain import value increased 4 percent. Cocoa's import value decreased less than 1 percent as the unit value rose slightly from the year before.

Live animal and animal product imports remained the same as in FY 1990. Increased value of beef and veal products, pork, and animal fats offset decreases in such dairy products as eggs, hides and skins, and particularly casein, milk, and cream. The value of

hides and skins dropped 19 percent from \$149 million to \$120 million.

The quantity and value of fruit imported also remained the same as last year. Short supplies of domestic apples triggered increased imports from Canada, and the California freeze stimulated imports of mangoes and melons from Mexico and fresh citrus from Mexico and Spain. Grape imports, which come almost exclusively from Chile, declined by 6 percent. Orange juice imports continued to decline as the Florida orange industry recovers from last year's freeze. Nut imports increased 35 percent largely due to increases in cashew nuts from India.

Vegetable import value dropped 7 percent, but values for tomatoes dropped 35 percent and peppers 17 percent. The Florida vegetable crops improved in 1991 after the 1990 freeze, boosting supply and reducing price.

Wine import value climbed slightly in FY 1991 mostly due to unit value increases. Volume dropped from 2.1 million hectoliters to 1.8 million. (Susan Pollack, Commodity and Trade Analysis Branch, 202-219-0822)

INDEX OF APPENDIX TABLES

Exports

Table		Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-June 1989/90 and 1990/91, and June 1991	A-4
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-June 1989/90 and 1990/91	A-61
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-June 1989/90 and 1990/91	A-62
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-June 1989/90 and 1990/91	A-63
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-June 1989/90 and 1990/91	A-64

Imports

B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-June 1989/90 and 1990/91, and June 1990 and 1991	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-June 1989/90 and 1990/91, and June 1991	B-4

Prices

C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

Foreign Agricultural Trade of the United States, Calendar Year 1989

Supplementary Tables

This report presents statistical summaries of U.S. foreign trade in agricultural products by country during calendar years 1988 and 1989. Exports and imports valued at more than \$1 million are shown. U.S. Bureau of the Census Schedule B and Tariff Schedule (TSUSA) listings are grouped in standardized economic classes or commodity groups. This report differs from the annual FATUS fiscal-year and calendar-year supplements by emphasizing country over commodity. Rather than searching through each table for a specific country's data, the reader can refer to the Contents for the country and glean all commodity information from a single table.

Effective January 1, 1989, the United States joined other countries in adopting a new export and import commodity classification system based on the international Harmonized Commodity Description (HS).

It's Easy To Order!
